

Artificial Intelligence Advisory Service

Tractica's Artificial Intelligence advisory service examines use cases and business models for the application of artificial intelligence technologies in enterprise, consumer, and government markets. Research focus includes analysis of technology trends that are driving the development of more robust cognitive technologies, the use cases and value propositions for artificial intelligence in specific industries, and the key industry players who are shaping the next stage of market evolution. Granular market sizing, segmentation, and forecasting models provide industry participants with an objective assessment of the business opportunity for artificial intelligence software, as well as the hardware and professional services that will enable the software deployments.

Topics Covered

- Cognitive Computing
- Computer Vision
- Deep Learning
- Machine Learning
- Machine Reasoning
- Natural Language Processing
- Predictive Computing
- Virtual Digital Assistants

Service Components

- More than 10 Artificial Intelligence research reports published per year
- Back catalog of all published Artificial Intelligence research reports
- Unlimited Analyst Inquiry access for special requests on Artificial Intelligence topics
- Quarterly conference call with the Artificial Intelligence analyst team to discuss market trends and address questions
- Annual full-day analyst on-site strategic advisory session including research presentations and roundtable discussions
- Input into Tractica's prioritization and scheduling of research projects
